## Sample code

```
async function toJSON(url) {
  try {
    let r = await fetch(url)
    if (!r.ok) exception(r.status)
    return r.json()
  } catch (e) {
    error(e)
  }
}

async function readUser() {
  const BR = "<BR>",
    URL = "https://api.github.com/users/"
  let u = await toJSON(URL + usr.value)
  if (!u || !u.login)
    error(usr.value + ' not found')
  out.style.color = '';
  out.innerHTML = '';
  let imgElmnt = document.getElementById("img");
```
