Sample code

```
function ReverseString(str) {
  return str.split('').reverse().join('')
}
function increment() {
  let x = kimlik.value.replaceAll(/\s/g, '')

  let c = x
  let number = ""
  let number2 = ""
  let control = 1
  for (let i = c.length-1; i>=0 ;i--){
    //console.log(c.charAt(i))
    if(c.charAt(i) == 9){
      control = 0
    }
    if(control == 1){
      number += c.charAt(i)
    }
    if(control == 0){
      number2 += c.charAt(i)
    }
  }

  let number2r = ReverseString(number2)
  console.log(ReverseString(number2))
  let num = Number(ReverseString(number))
  //let num2 = Number(ReverseString(number2))

  // console.log(num)
  num+=97
  //console.log(num)
  num = num.toString()
  let con = number2r.concat(num)
  console.log(con)
```
