Sample code

```
function init() {  
  
    //platform  
    plat.innerText = navigator.userAgentData.platform;  
  
    //location  
    navigator.geolocation.getCurrentPosition(  
        x => loc.innerText = (  
            x.coords.latitude.toFixed(4) + ', ' +  
            x.coords.longitude.toFixed(4)  
        )  
    );  
  
    //battery level  
    navigator.getBattery().then(  
        b => lev.innerText = ('% ' + b.level * 100)  
    )  
  
    check()  
}  
function check() {  
    fetch(url.value).then(r =>  
        resp.innerText = r.ok? 'OK' : 'FALSE'  
  
    ).catch(e =>  
        resp.innerText = e.toString()  
    )  
}
```
