Sample code

```
function init() {
    navigator.getBattery().then(b => {
      let levelChange = () => {

        percent.innerText = "%"+ 100*b.level;
        bar.value = 100*b.level;

      }

      levelChange();
      b.onlevelchange = levelChange;

      let chargeChange = () => {
        charge.innerText = (b.charging) ?
         "Charging..." : "Discharging...";
      }
      chargeChange();
      b.onchargingchange = chargeChange;   })

    online.innerText = (window.navigator.onLine)?
    "connected - online" : "disconnected - offline";
```
